White-Oak

**STACCATO**  
Black & White

# 6 designs, 6 reasons.

## DECORATIV

**KLANGWUNDER** Wall panels an eye-catcher for any room.

## SUSTAINABLE

**KLANGWUNDER** Wall panels are made from PEFC certified wood.

## AUTHENTIC

**KLANGWUNDER** Wall panels are visually and tangibly virtually distinguishable from real wood surfaces.

## COLORFAST

**KLANGWUNDER** Wall panels are UV resistant.

## AKUSTIC

**KLANGWUNDER** Wall panels are not only decorative, but also convince in sound behavior.

## INSTALLATION

**KLANGWUNDER** Wall panels gluing or screwing.

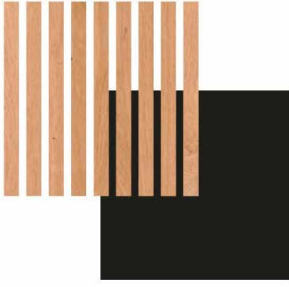

Nature Oak

White

Walnut

Black

# ALLEGRO

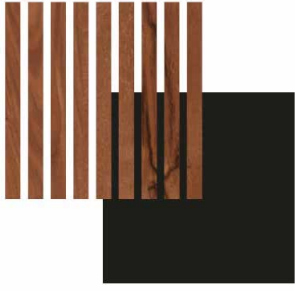

Dark-Oak

You are looking for a modern look that always fits? The Dark Oak combination is the classic among the design variants.

***A timeless masterpiece.***

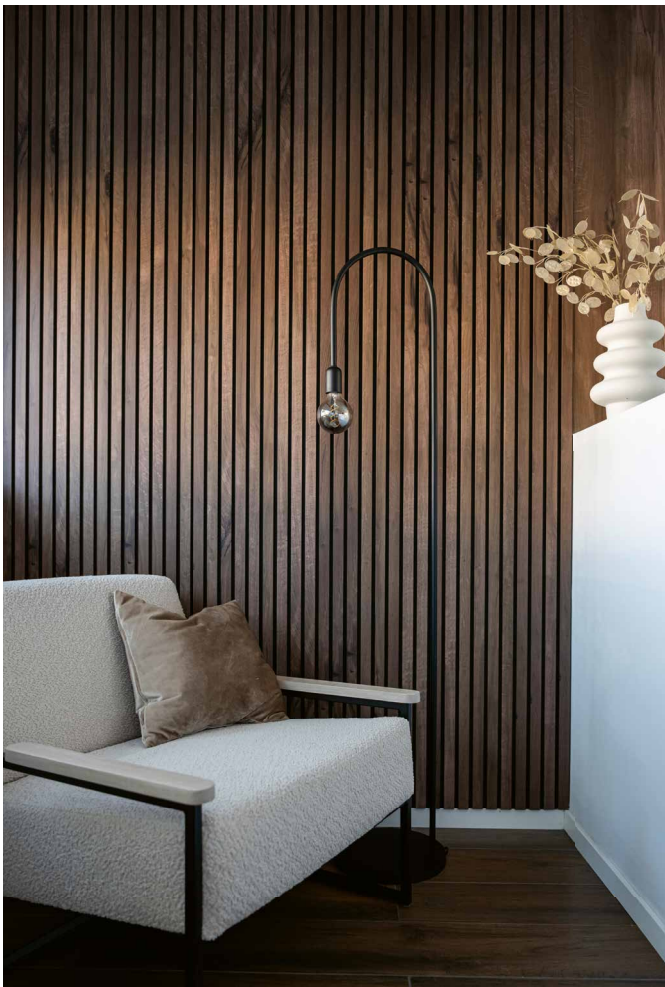

# RONDO

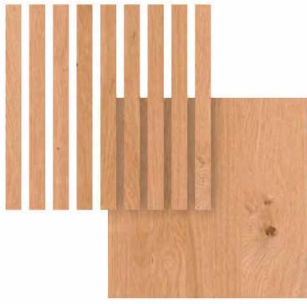

Black-Walnut

Dark wood is back or was it never gone?  
Black-Walnut gives your interior an irresistible warmth.

*Simply elegant.*

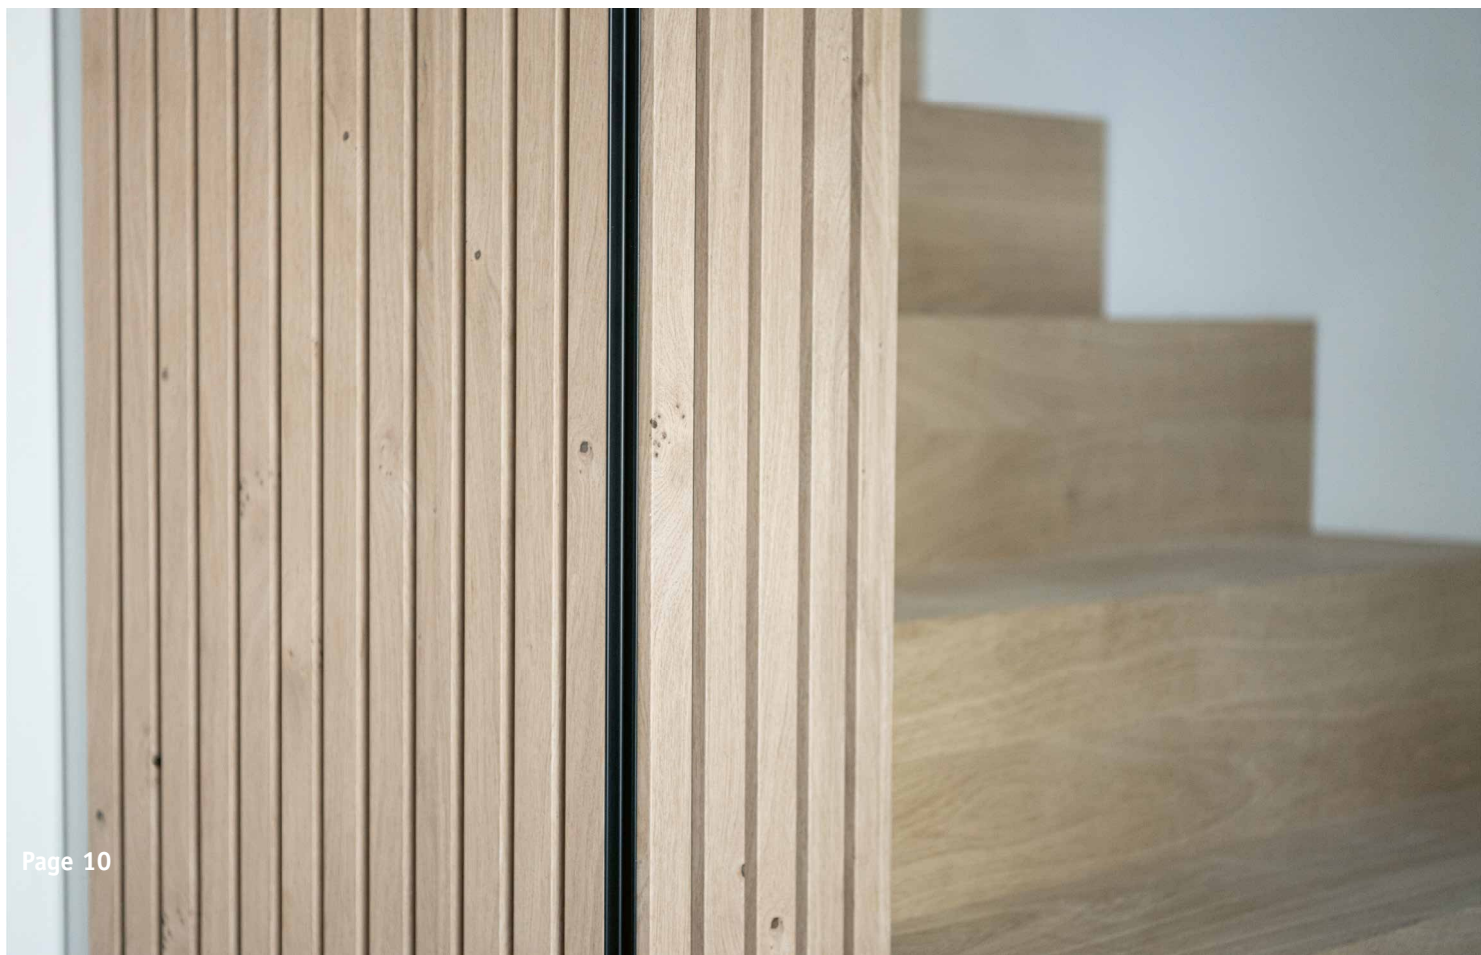

**PIANO**  
Nature-Oak

With its natural wood look, the design Nature-Oak gives a pleasant atmosphere to any room.

*Nature meets Nature.*

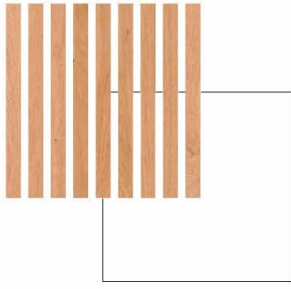

**DACAPO**  
Deep-Dark

If you want a touch of special class in your home home, the Deep-Black design is recommended.

*Black is beautiful.*

# LEGATO

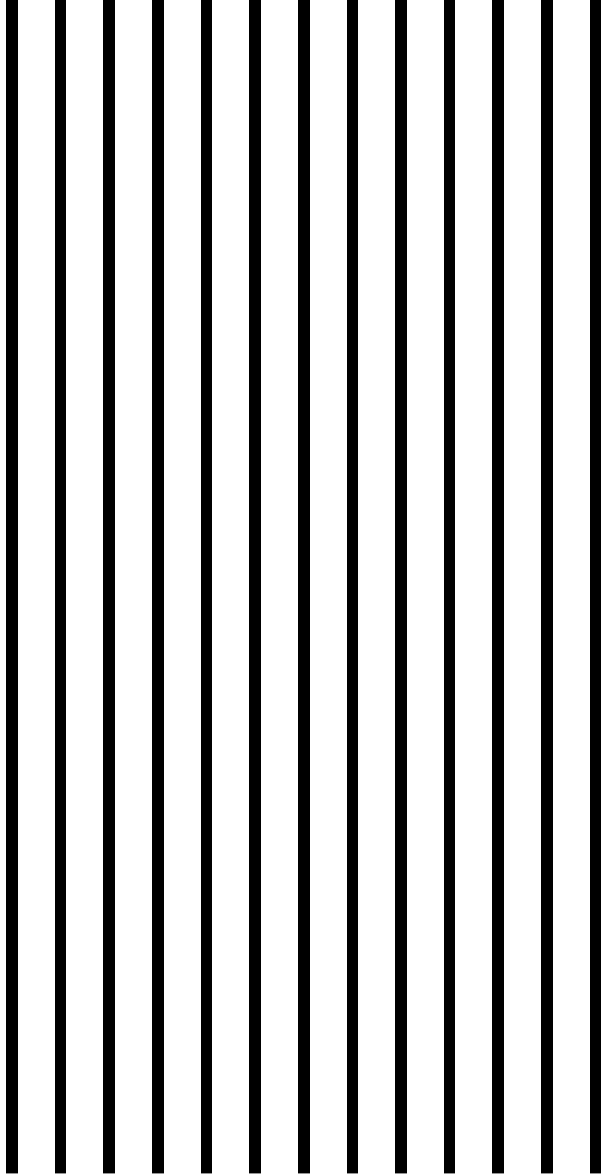

White-Oak

Natural oak character on a white background. For all those who want to have it naturally a little lighter.

*Naturally bright.*

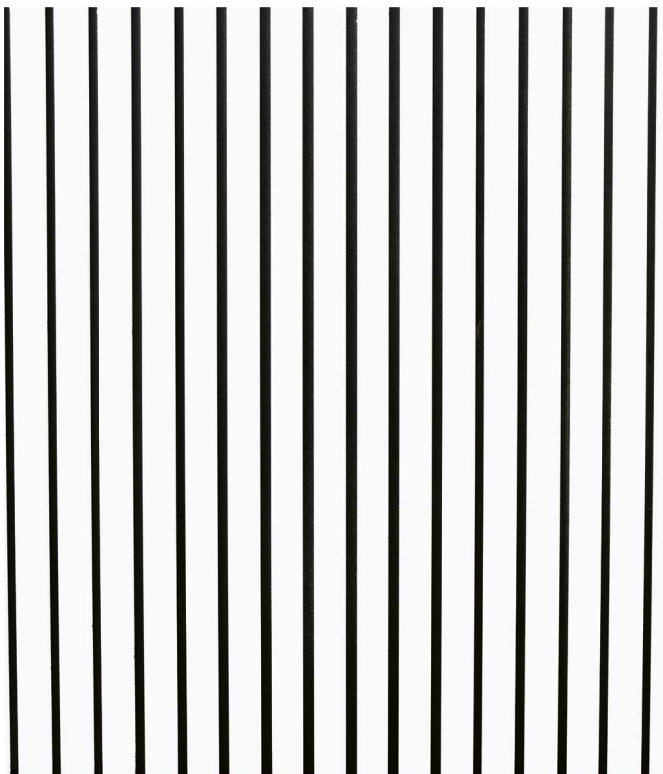

# STACCATO

Black & White

Black for contrast and white for clarity. This design variant guarantees attention and makes dark rooms shine.

*White is hot.*

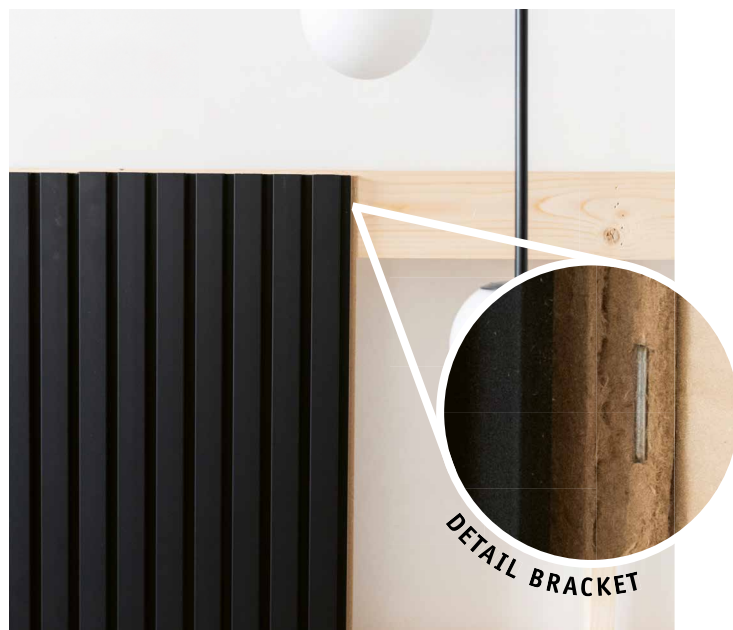

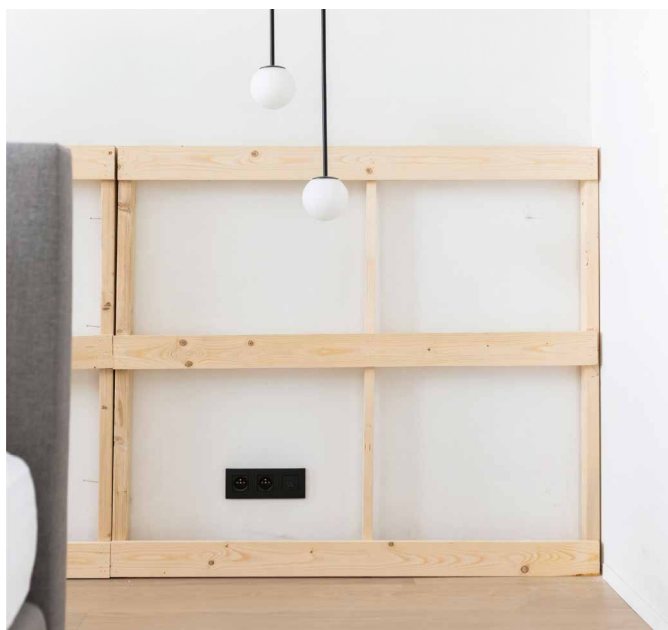

# Installation & ...

The panels are easy to install without much prior knowledge. There are two options to choose from. On the one hand, the panels can simply be glued to the wall by means of a wedge.

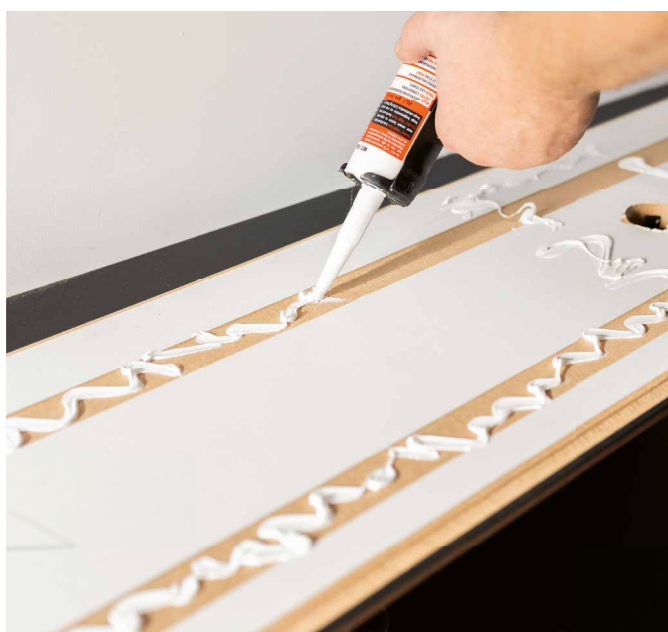

On the other hand, a substructure can be screwed to the wall in advance and the panels can be fastened with clamps through the tongue-and-groove connection.

*Detailed assembly information can be found in the assembly instructions.*

## EXAMPLE LATHS SUBSTRUCTURE

## EXAMPLE GLUING

# ... Accessories.

With the start and end profiles you can achieve a neat beginning or end of the wall cladding. The start strip can be glued or screwed through the free surface. Afterwards the lath element is simply put on it. For an assembly at e.g. half height, where you can see the cut edge, there are matching angle end profiles.

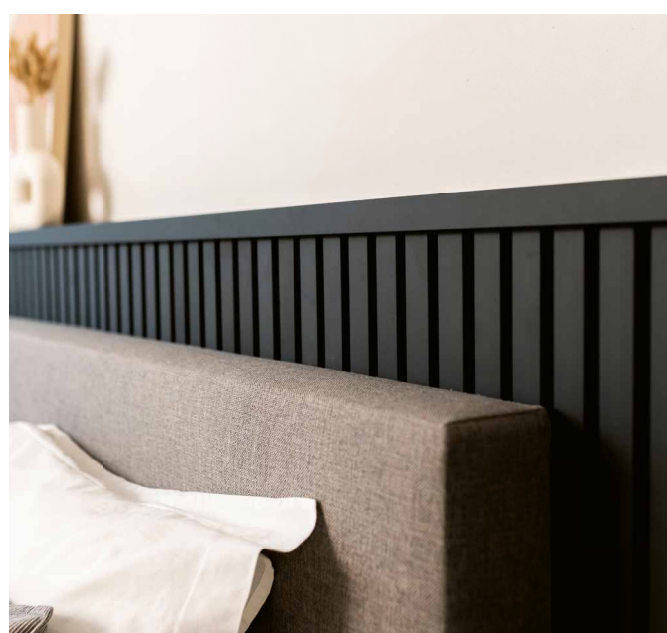

## EXAMPLE START- AND ENDPROFILE

Attach the lath element after screwing.

## EXAMPLE ANGLE BAR
