ACOUSTIC WALL PANELS

**listen. convert. deliver.**

"Founded in 1873 as an agency for round and sawn timber, we are now **producer, importer and service provider** for the European retail. We find it our responsibility to **listen** to the market, to **convert** the demand into strong concepts and to **deliver** products with the requested **quality, style and durability**. Today, we produce and import over 6.500 containers of **outdoor and indoor floors and wall** on a yearly basis."

- *Stephan von Schreitter, CEO F.W. Barth & Co GmbH*

# acoustic wall panels

## distinctive wall panels in Scandinavian style

Our acoustic wall panels bring coziness into your home with their warm wooden look. The **different wood surfaces** create an unmistakably homely atmosphere. The panels make the room seem deeper and larger thanks to the striped look. The wood is **FSC certified** and made of black-colored MDF slats with real wood veneer.

## better vibe

The **felt back panel** is made from sustainable materials such as PET bottles, is finished in such a way that a new panel can be worked on immediately and the correct distance between the slats is maintained.

- suitable for walls and ceilings
- FSC™ certified
- easy to cut to the right size with a sharp, fine-toothed saw
- easy installation with mounting glue or screws
- reaction to fire: B-s1, d0

## creating a more pleasant and quiet sound environment

The **sound-absorbing panel** mitigate the background noise and reduce the reverberation and echo in a space. Because the wood strips are evenly spaced on the felt support, the medium and high frequencies in particular are attenuated and the acoustic felt absorbs the remaining sound. This **reduces reverberation** and ensures a clear sound image as well as a calming room climate. According to measurement, the panels can dampen the acoustics by up to 50 %.
